AI Use Case Intake Form

Standard intake, triage, and approval form for proposed or materially changed AI use cases.

Version: 1.0 **Classification:** Confidential **Owner:** AI Governance Lead

Use this form to capture the business purpose, data profile, risk triggers, and approval conditions for any new or materially changed AI activity. It is designed to help SMBs review quickly without turning governance into paperwork theater.

Prepared for: {{COMPANY_NAME}}

1. Overview

This intake form is the standard entry point for reviewing AI use cases before approval, expansion, or material change. It creates a consistent record for business, IT, security, privacy, legal, and compliance reviewers.

2. When to use this form

- New AI tools, copilots, agents, assistants, or AI-enabled features.
- Material changes to an already approved use case, such as new data types, new vendors, new users, or customer-facing deployment.
- Third-party AI tools that will process company, employee, customer, supplier, or partner data.
- Pilots, proofs of concept, or experiments that may move into production.

3. Fast triage outcomes

Outcome	Meaning	Typical treatment
Fast-track	Low-risk internal use with no sensitive data and no high-impact decisions.	Approve with standard guardrails and enter in registry.
Standard review	Moderate-risk use or approved tools handling internal confidential data.	Security/business review and control conditions documented.
Escalated review	Sensitive data, customer impact, automated decisions, or unclear vendor posture.	Cross-functional review; additional controls or restriction may apply.

4. Completion instructions

- The requester completes Sections A-H before submission.
- The reviewer or governance lead completes Sections I-K during triage.
- Be specific. Short vague answers create longer review cycles.
- If the use case is already live, state that clearly and provide the current state in the business justification.

5. Section A - Request profile

Use Case ID	{{ID}}	Date Submitted	{{DATE}}
Business Owner	{{OWNER_NAME}}	Department / Function	{{DEPARTMENT}}
Requester Name	{{REQUESTER_NAME}}	Requester Email	{{EMAIL}}
Implementation Stage	Idea / Pilot / Live / Change	Target Decision Date	{{TARGET_DATE}}

6. Section B - Business objective and value

Business problem or opportunity

Describe the process pain point, capacity gap, customer need, or decision bottleneck.

{{ENTER_RESPONSE}}

Proposed AI-enabled solution

Explain what the AI tool or workflow will do and where it will be used.

{{ENTER_RESPONSE}}

Expected business value

State expected benefits such as time saved, quality uplift, risk reduction, revenue support, or customer experience improvement.

{{ENTER_RESPONSE}}

7. Section C - Tool, vendor, and deployment profile

AI Tool / Service	{{TOOL_NAME}}	Vendor	{{VENDOR_NAME}}
Deployment Model	SaaS / Embedded / API / Internal	Environment	Prod / Pilot / Sandbox
Primary Users	{{USER_GROUPS}}	Customer-Facing	Yes / No
Third-Party Subprocessors	{{KNOWN_SUBPROCESSORS}}	Model Provider	{{MODEL_PROVIDER}}
Integrations / Connected Systems	{{SYSTEMS}}	External Sharing	Yes / No / Unknown

8. Section D - Data profile

Data category	Included?	Description / examples	Control notes
Public or non-sensitive data	Yes / No	{{DESCRIBE_IF_APPLICABLE}}	{{MASK / MINIMIZE / APPROVED ONLY}}
Internal confidential business data	Yes / No	{{DESCRIBE_IF_APPLICABLE}}	{{MASK / MINIMIZE / APPROVED ONLY}}
Customer or consumer data	Yes / No	{{DESCRIBE_IF_APPLICABLE}}	{{MASK / MINIMIZE / APPROVED ONLY}}
Employee or HR data	Yes / No	{{DESCRIBE_IF_APPLICABLE}}	{{MASK / MINIMIZE / APPROVED ONLY}}
Financial / legal / regulated data	Yes / No	{{DESCRIBE_IF_APPLICABLE}}	{{MASK / MINIMIZE / APPROVED ONLY}}
Source code / security data / credentials	Yes / No	{{DESCRIBE_IF_APPLICABLE}}	{{MASK / MINIMIZE / APPROVED ONLY}}
Personal data / sensitive personal data	Yes / No	{{DESCRIBE_IF_APPLICABLE}}	{{MASK / MINIMIZE / APPROVED ONLY}}

Enter only the categories that are actually required. If data can be minimized, masked, or removed before AI processing, state that as a control rather than burying it in a note.

9. Section E - Output and decision impact

Output type	Draft text / summary / code / decision support / other	Outputs used for decisions?	Yes / No
Human review before action	Always / Sometimes / No	Affects customers or employees?	Yes / No
Automated action taken from output	Yes / No	Decision domain	HR / Finance / Legal / Ops / Customer / Other

Error tolerance	Low / Medium / High	Fallback if AI fails	{{FALLBACK_PROCESS}}
-----------------	---------------------	----------------------	----------------------

10. Section F - Risk screening questions

Check all triggers that apply. Any single high-impact trigger may require escalated review.

Risk trigger	Response	Notes / evidence
Will the tool process personal, confidential, or regulated data?	Yes / No	{{OPTIONAL_NOTE}}
Will outputs influence decisions about people, money, legal rights, safety, or customer treatment?	Yes / No	{{OPTIONAL_NOTE}}
Is the use case customer-facing or externally visible?	Yes / No	{{OPTIONAL_NOTE}}
Is any automated action taken without human review?	Yes / No	{{OPTIONAL_NOTE}}
Is the vendor or model provider unknown, immature, or unable to explain data handling?	Yes / No	{{OPTIONAL_NOTE}}
Will data be retained, used for training, or shared with subprocessors?	Yes / No	{{OPTIONAL_NOTE}}
Does the use case operate across jurisdictions with privacy or sector-specific requirements?	Yes / No	{{OPTIONAL_NOTE}}
Could an incorrect output create material operational, legal, or reputational harm?	Yes / No	{{OPTIONAL_NOTE}}

Escalate immediately if the use case involves sensitive data, customer-facing decisions, HR or employment impact, legal interpretation, payments, safety, or any automated action without reliable human review.

11. Section G - Requested controls or conditions

Required safeguards before launch
{{ENTER_DETAILS}}
Monitoring, QA, or human review steps
{{ENTER_DETAILS}}
Requested exceptions, if any
{{ENTER_DETAILS}}

12. Section H - Reviewer triage summary

Triage status	Fast-track / Standard / Escalated / Hold	Overall risk level	Low / Medium / High
Primary reviewer	{{REVIEWER}}	Review date	{{REVIEW_DATE}}
Security review required	Yes / No	Privacy / Legal review required	Yes / No
Vendor review required	Yes / No	Registry entry complete	Yes / No
Decision recommendation	Approve / Approve with conditions / Reject / More info	Next review date	{{NEXT_REVIEW_DATE}}

13. Section I - Reviewer findings and conditions

Key findings
{{REVIEWER_NOTES}}

Mandatory conditions for approval
{{REVIEWER_NOTES}}

Outstanding questions / evidence needed
{{REVIEWER_NOTES}}

14. Section J - Final approval record

Decision	Approved / Approved with conditions / Rejected / Deferred	Decision date	{{DECISION_DATE}}
Approving role	{{ROLE}}	Approver name	{{APPROVER_NAME}}
Implementation allowed before controls complete?	Yes / No	Registry status	Entered / Pending
Business sign-off	{{OWNER_SIGNOFF}}	Security sign-off	{{SECURITY_SIGNOFF}}

15. Field guidance and scoring prompts

Use the prompts below to improve answer quality and reduce back-and-forth during review.

Field	What good looks like	Weak answer example
Business objective	Ties the use case to a real process, measurable value, and defined owner.	"Use AI to help us."
Data profile	Names the exact data categories and whether sensitive data is involved.	"May include files."
Decision impact	States whether humans review outputs before action and what happens if AI is wrong.	"Team will use it as needed."
Vendor details	Identifies vendor, model provider, and retention or training concerns.	"Vendor TBD."
Controls	Lists specific safeguards, not vague intentions.	"We will be careful."

16. Quick processing checklist

Checklist item	Complete
Requester completed Sections A-H with specific details.	☐
Use case entered or updated in the AI Use Case Registry.	☐
Risk triggers checked and escalations initiated where required.	☐
Vendor due diligence request launched if third-party AI is involved.	☐
Final decision and conditions recorded and communicated.	☐
