Policy Overview

Purpose	Defines what data may be used in AI systems, what data is restricted or prohibited, and how AI-related data must be classified, retained, deleted, transferred, and protected.
Scope	Applies to all AI systems that process company, customer, employee, or third-party data, including prompts, uploads, outputs, logs, and retrieval content.
Primary owner	Privacy Lead / Data Protection Lead
Audience	Employees using AI, data owners, system owners, Privacy, Security, Legal, and procurement teams

Policy Statements

- Data entered into AI systems shall be classified and handled in accordance with enterprise data classification and privacy requirements.
- Restricted, sensitive, personal, regulated, or customer-confidential data may only be processed in approved AI systems that are explicitly authorized for those data categories.
- AI vendors and internal AI solutions shall disclose data retention, deletion, subprocessors, regional processing, human review access, and training use of submitted data.
- The enterprise shall prohibit use of AI systems that reuse customer or employee data for model training without explicit authorization and documented approval.
- Cross-border transfers, regional processing, and remote support access involving AI systems must follow enterprise privacy, contractual, and transfer requirements.
- Prompts, uploads, outputs, and AI logs that contain personal or sensitive information shall be retained only as long as necessary for the approved purpose and then securely deleted or archived.
- The enterprise shall support privacy impact review for AI use cases involving personal data, profiling, monitoring, or decisions affecting individuals.

Roles and Responsibilities

- Privacy Lead defines privacy requirements, review triggers, and data protection expectations for AI use.
- Data owners classify information and approve use of data categories in AI systems.
- System owners ensure approved retention, deletion, transfer, and regional controls are implemented.

- Security and Procurement validate vendor commitments for data handling, subprocessors, and access.
