AI Governance Policy

Standalone Branded Policy Document

Practical governance beats vague good intentions.

Primary owner	Executive Sponsor / AI Governance Lead
Version	v1.0 Paid SMB Edition

Use this document as a client-ready policy baseline. Customize named roles, escalation paths, and references to internal standards, classifications, and regulatory obligations before approval.

Policy Overview

Purpose	Defines the governance structure for AI across the enterprise, including ownership, oversight, approval authority, escalation, risk accountability, and review responsibilities.
Scope	Applies to all enterprise AI systems, AI use cases, embedded AI capabilities, significant model/provider changes, and related governance forums and records.
Primary owner	Executive Sponsor / AI Governance Lead
Audience	Executive leadership, business owners, Security, Privacy, Legal, IT, Procurement, Risk, and Compliance teams

Policy Statements

- The enterprise shall maintain a formal AI governance structure with defined ownership, decision rights, escalation paths, and oversight responsibilities.
- Every AI system and AI use case shall have an accountable business owner and an identified technical or platform owner.
- New AI use cases, major changes, and exceptions shall be reviewed through the enterprise AI intake and risk assessment process before approval.
- The AI Governance Lead shall maintain the AI system inventory, governance standards, review cadence, and reporting to leadership.
- High-risk or sensitive AI use cases shall receive enhanced review involving Security, Privacy, Legal, and relevant business stakeholders before deployment.
- The enterprise shall review AI risks, control gaps, incidents, and exceptions on a periodic basis and track remediation to closure.
- No AI initiative may bypass required governance merely because the capability is bundled into an existing SaaS product or business workflow.

Roles and Responsibilities

- Executive Sponsor provides direction, resolves escalations, and approves material risk decisions.
- AI Governance Lead runs the intake process, inventory, review cadence, and governance reporting.
- Business owners are accountable for approved use cases, outcomes, and operational controls.

- Security, Privacy, Legal, IT, and Procurement support reviews based on risk tier and change impact.
