

GovSecure AI Policy Suite

GovSecure AI Policy Suite

Single-offering package of core policies, supporting standards, forms, questionnaire, registry, and charter

Document Code: GS-AIPS-GUIDE-01

Audience	Style	Package
SMBs and growing enterprises	Creative-enterprise, client-ready	Operational governance toolkit

For internal operational use and paid client delivery. Customization remains the responsibility of the adopting organization.

What is included

This package combines the core policy layer already completed with the operational artifacts needed to turn policy into day-to-day governance. It is designed as a paid SMB-friendly offering that can be adopted internally or delivered to clients as a practical AI governance starter set.

Component	What the component does
8 core policies	Standalone licensed DOCX and matching PDF versions of the primary AI governance policies.
4 supporting standards / procedures	Operational documents that define logging, change control, transparency, and records/evidence expectations.
1 AI use-case intake form	A branded form in DOCX and XLSX for requesting and screening new AI use cases.
1 vendor questionnaire	The GovSecure Third-Party AI Privacy Risk Assessment in DOCX, PDF, and XLSX.
1 AI system registry	A standalone XLSX register to inventory approved AI systems, owners, vendors, and review status.
1 executive governance charter	A charter defining governance authority, membership, cadence, and outputs.

Package structure

- 00_Overview — offering guide and usage notes
- 01_Core_Policies — licensed standalone policy documents in DOCX and PDF
- 02_Supporting_Standards_and_Procedures — four operational standards/procedures in DOCX and PDF
- 03_Forms_and_Registers — use-case intake form and system registry in editable formats
- 04_Questionnaires — third-party AI privacy vendor questionnaire and scoring workbook
- 05_Governance_Charter — executive AI governance charter in DOCX and PDF

Recommended deployment sequence

- Adopt or tailor the Executive AI Governance Charter and AI Governance Policy first so ownership is not left floating.
- Publish the Enterprise AI Acceptable Use Policy and AI Data Handling and Privacy Policy next so day-to-day use has guardrails.
- Stand up the AI Use-Case Intake Form, Third-Party AI Privacy Risk Assessment, and AI System Registry so approvals and inventory start immediately.

- Layer in the supporting standards and procedures for monitoring, changes, disclosure, and evidence retention once the initial intake and inventory process is running.
